February 19, 2018

Dear Valued Customer,

Going forward we will be turning our full focus to growing our construction and demolition facility, dumpster rental business and increasing the production of mulch and gravel made from the raw material we harvest. From these roots, we will realign our efforts and position ourselves to grow our organization in other areas.

The decision to close our household waste processing facility was not an easy one as much time, effort and expense have gone into it. However, with the severe drop in commodity prices over the past few years and the bleak forecast, we have made the economic decision to close our household processing facility. We will concentrate our efforts in areas of our business that are more profitable and that can ensure our organization has a strong future.

We look forward to continuing to service your construction, demolition needs at our facility. We appreciate you paying all remaining household waste invoices for van der Linde Recycling within the next 30 days.

Sincerely,

Peter van der Linde

Owner, van der Linde Recycling & Container Rentals
